ReWear AI

Wireframes and Interaction Review | v0.2

Proposed design - review with both project partners before approval

13 low-fidelity screens and state references

US1 / #6	Account and Sign-In (your story)
US3 / #8	Clothing Classification (your story)
US2, US4-15	Shared product flows and edge states
Rubric	Design covers UI behavior; engineering evidence tracked separately

Source of truth: docs/PRD.md + AGENTS.md + assigned GitHub issues. No implementation claims.

01 Account creation and sign-in

Your Sprint 2 story: authentication, session persistence, sign-out and private access.

Sign in

Access only your private wardrobe

Email

name@example.com

Password

Password

Sign in

New here? Create an account

Sign-up and security states

Companion states, not extra product features

Create account

Email + password / approved auth method

Validation or sign-in error

Explain the problem without exposing whether a private account exists.

Session and privacy behavior

Stay signed in after refresh; sign out; block access to other users' data.

Decision to confirm: email/password or OAuth provider; never depict both as committed until selected.

Fields: Email + Password (Required if credentials auth is chosen); method pending confirmation.
Failure: Enter a valid email / Sign-in failed. Check your details and try again.

02 Home / navigation hub

Simple entry points; no fabricated analytics or shopping features.

ReWear AI | Home | Wardrobe | Create Outfit | Saved Outfits | History | Account v

Welcome back

Your wardrobe, your outfits, all in one place.

My Wardrobe

View and organize saved clothing

Open

Create Outfit

Choose an occasion

Open

Saved Outfits

Revisit combinations

Open

First-time empty wardrobe

No items yet? Show Add your first clothing item - not invented outfit previews.

Header includes account menu with Sign out. Private content appears only after authentication.

Fields: No required form fields on Home.
Failure: Could not load your wardrobe summary. Retry.

03 My Wardrobe: search, filters and availability

One consistent grid for both partners; search and attribute filters can be combined.

ReWear AI | Home | Wardrobe | Create Outfit | Saved Outfits | History | Account v

My Wardrobe

+ Add Clothing

Search: Search names and attributes...

Category: All

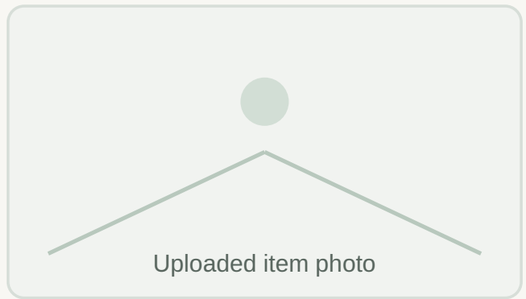

Color: All

Season: All

Formality: All

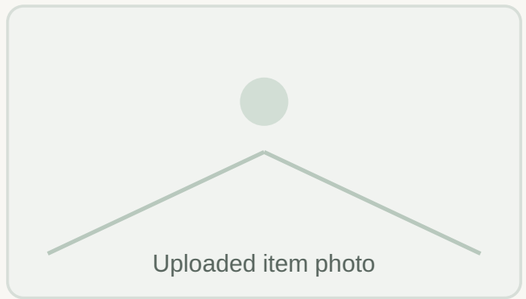

Showing 12 of 12 items

Clear filters

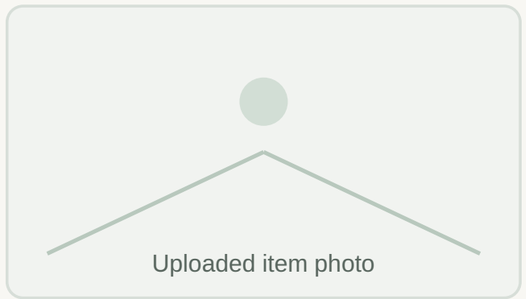

White Oxford Shirt

Available

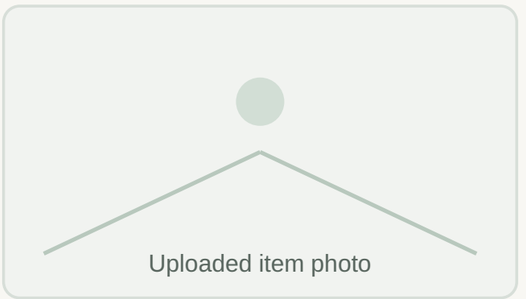

Blue Jeans

Available

Winter Sweater

Unavailable

Black Blazer

Available

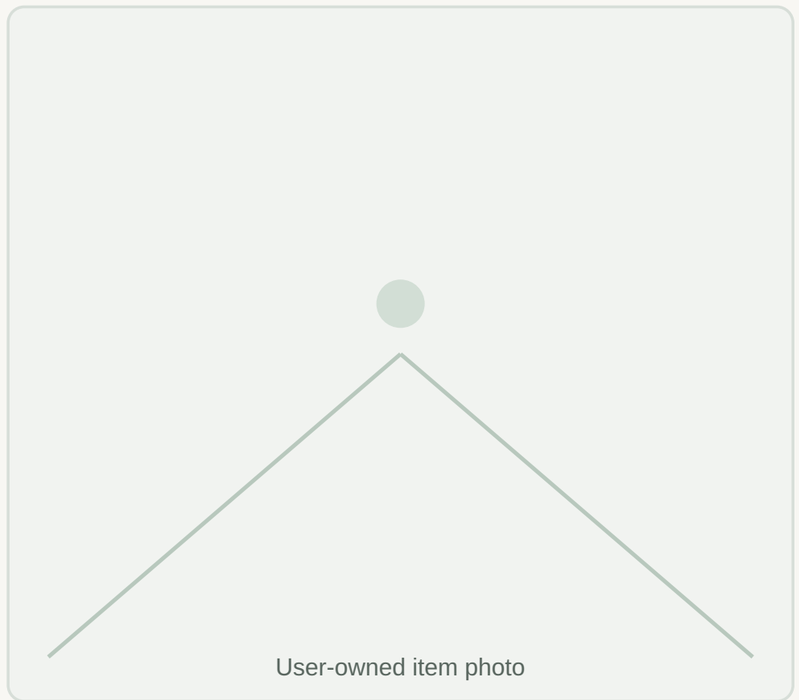

Item card opens details. Empty wardrobe and zero search matches require distinct recovery states.

Fields: Search, Category, Color, Season, Formality (Optional).
Failure: Could not load your wardrobe. Retry; keep current filters.

04 Clothing detail, edit and availability

Editing is persistent; deletion is confirmed; availability changes outfit eligibility.

ReWear AI | Home | Wardrobe | Create Outfit | Saved Outfits | History | Account v

Delete requires explicit confirmation.

White Oxford Shirt

Category: Top

Color: White

Style: Classic

Season: All-season

Formality: Smart casual

Availability: Available | Unavailable

Save changes

Delete item

State variations: unsaved edits, validation errors, delete confirmation, access denied/not found.

Fields: Edit metadata (Required/Optional: team to confirm); availability is a toggle.
Failure: Could not save changes or delete this item. Retry.

05 Add clothing: image upload

Upload preview and validation; classification begins only after a valid image is provided.

ReWear AI | Home | Wardrobe | Create Outfit | Saved Outfits | History | Account v

Upload a clothing photo

Only photos of clothing the user owns

[Image preview / drop zone]

Choose image or drag a file here

Format and size rules shown here

Choose photo | Cancel

Upload states

- Ready — File selected; preview visible
- Uploading — Progress shown; prevent duplicate submit
- Invalid image — Explain allowed format/size
- Upload failed — Retry without losing entered data

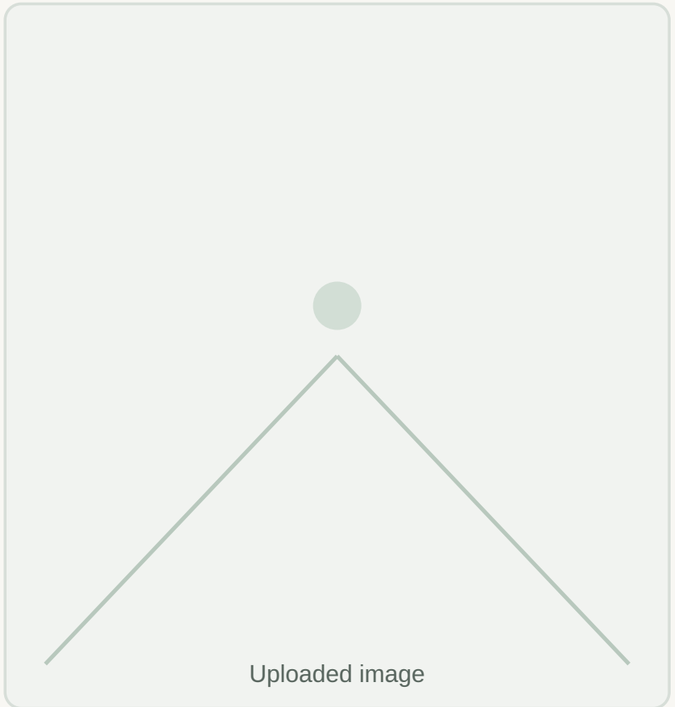

Do not save a partial or duplicate wardrobe record when upload fails.

Fields: Clothing image (Required for upload); supported formats and size validated.
Failure: Unsupported file. Choose another image / Upload failed. Retry.

06 Clothing classification: review before save

Your Sprint 2 story: suggest category, color, style, season, formality; user corrects them.

ReWear AI | Home | Wardrobe | Create Outfit | Saved Outfits | History | Account v

Review suggested clothing details

These are suggestions - not confirmed values

Category: Top v

Color: White v

Style: Classic v

Season: All-season v

Formality: Smart casual v

Edit details | Confirm and save

Save only after user confirmation. No silent overwrite of corrected fields.

Dependency: US2 supplies uploaded image; US11/US15 cover uncertain/failed classification states.

Fields: Category, Color, Style, Season, Formality (Required/Optional: team to confirm).
Failure: Correct highlighted fields / Could not save this item. Retry.

07 Uncertainty and failure recovery

Error paths must distinguish failed upload from failed image analysis.

ReWear AI | Home | Wardrobe | Create Outfit | Saved Outfits | History | Account v

Classification needs review

Could not identify all details confidently.

Review and correct suggestions before saving. Nothing is saved automatically.

Edit details manually | Retry classification

Upload or analysis failed

We could not process this image.

Explain whether the upload failed or analysis failed; keep the user's progress.

Retry | Enter details manually

On retry: prevent duplicates. Manual entry must remain available if classification fails.

Fields: Manual-entry requirements pending team confirmation; user must confirm before save.
Failure: Could not analyze image. Retry analysis or enter details manually.

08 Create an outfit: occasion and eligibility

Only saved and currently available clothing can be used.

ReWear AI | Home | Wardrobe | Create Outfit | Saved Outfits | History | Account v

Create an Outfit

Select one approved occasion

Work | Dinner | Weekend | Casual | Formal

Generate outfit

When there are not enough items

Not enough suitable clothing

We cannot make a valid outfit for this occasion using available items in your wardrobe.

View wardrobe | Add clothing

No marketplace or invented clothing. Keep the selected occasion when a request fails.

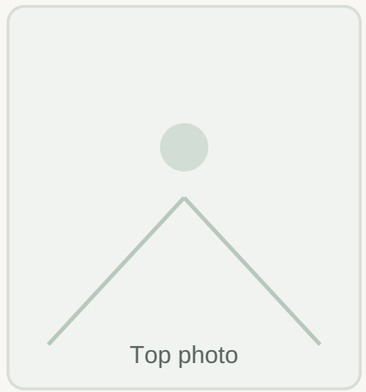

Fields: Occasion (Required); other preference fields only if separately approved.
Failure: Choose an occasion / Could not generate outfit. Retry.

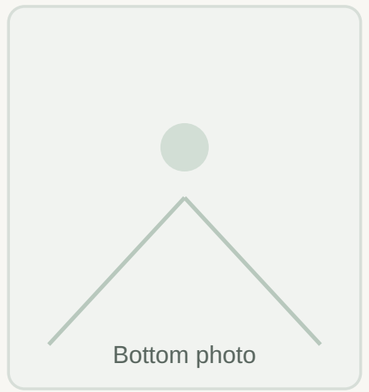

09 Outfit result, alternatives, explanation, feedback

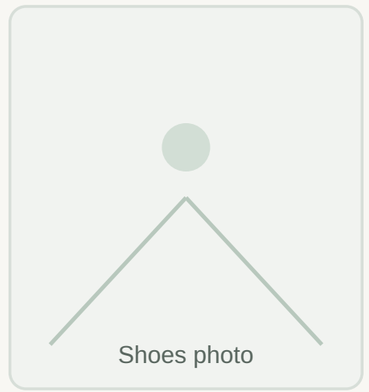

Primary result screen; show explicit controls and saved feedback state.

ReWear AI | Home | Wardrobe | Create Outfit | Saved Outfits | History | Account v

Your outfit for Dinner

Why this outfit?

Grounded explanation, not fashion certainty

This combination uses available wardrobe items and matches the selected Dinner occasion.

Try another outfit | Save outfit | Mark as worn

Was this recommendation helpful?

Helpful | Not helpful | Clear feedback

If no other valid combination exists, keep current outfit visible and explain why.

Persist save, worn date and feedback; allow feedback to be changed or cleared.

Fields: Recommendation feedback (Optional); no field needed to review outfit.
Failure: Could not save outfit or feedback. Retry without losing the selection.

10 Saved outfits: revisit and remove

Saved outfit preserves exact item references; removal is a separate action.

Office Look

Saved Oct 20

Remove saved

If a source item is deleted, show a clear missing-item state; do not fabricate replacements.

Empty state: No saved outfits yet -> Create an outfit. Confirm destructive removal.

Fields: No required form fields to browse saved outfits.
Failure: Could not remove saved outfit. Retry.

11 Outfit history and worn dates

Mark as worn from a recommendation or saved outfit; show history in date order.

ReWear AI | Home | Wardrobe | Create Outfit | Saved Outfits | History | Account v

Casual Weekend

Worn Oct 20, 2026 | Weekend

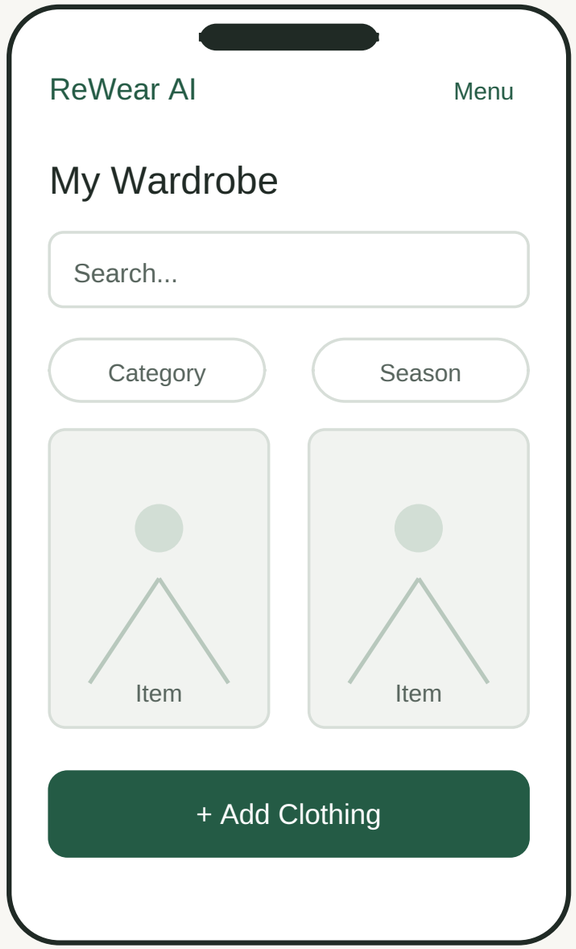

View details >

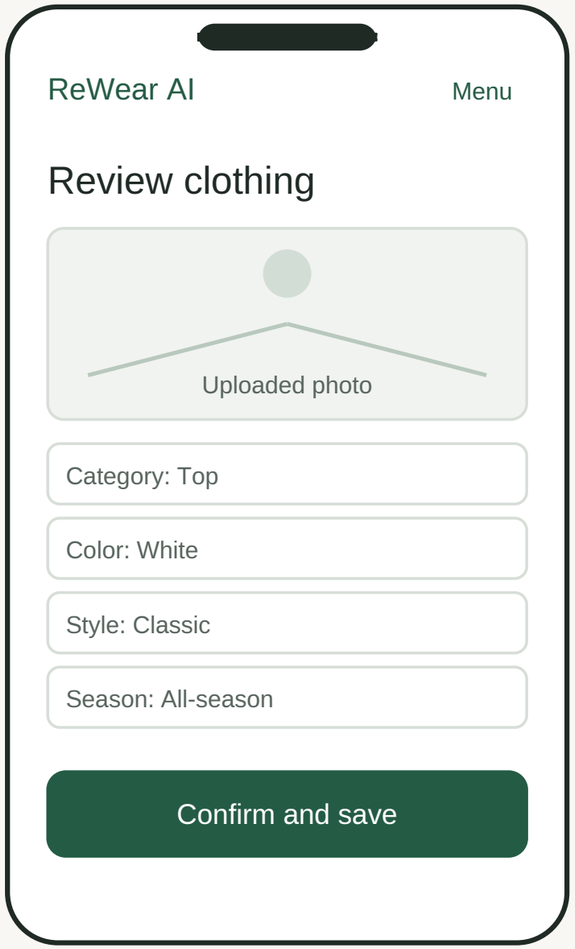

Empty state: No outfits recorded yet. History persists after refresh and across sessions.

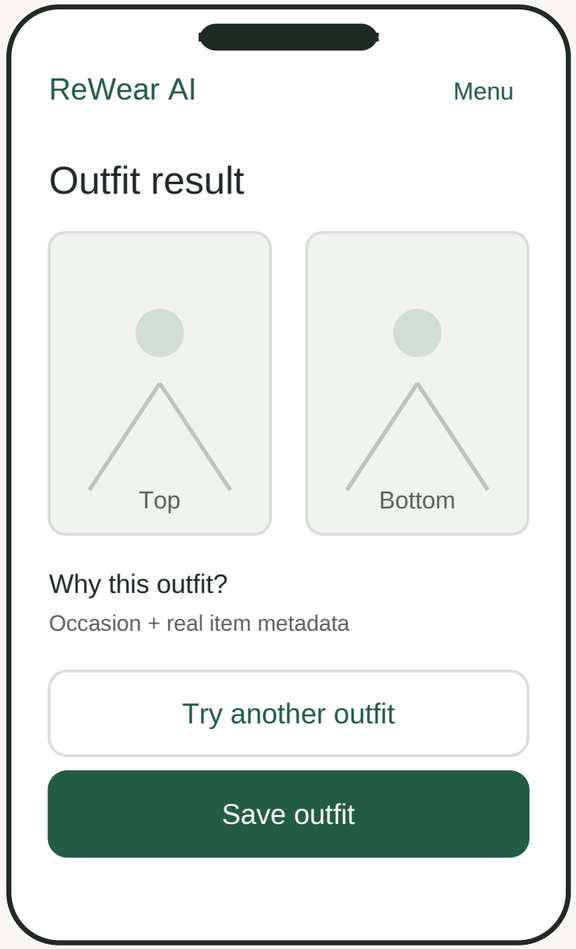

Fields: Select outfit to mark worn; worn-date requirement pending team confirmation.
Failure: Could not record outfit as worn. Retry without duplicating.

12 Responsive mobile states

Compact navigation; stacked forms; touch-friendly actions and readable status labels.

Mobile must also support errors, keyboard access, labels and non-hover actions.

Fields: Same Required/Optional labels as the matching desktop forms.
Failure: Same field-level and page-level errors; keep recovery action visible.

13 Required state coverage / team QA

A checklist for reviewing the full flow, not a claim that these states are implemented.

Authentication

Sign-up / sign-in / expired / logout / access denied

Upload

Preview / progress / invalid file / retry

Classification

Suggested / corrected / uncertain / manual entry

Wardrobe

Grid / edit / delete / availability / no matches

Generation

Valid outfit / insufficient items / error / no alternatives

Saved + History

Save / remove / worn date / empty states

Feedback

Positive / negative / change / clear / save error

Cross-cutting

Loading / empty / error / mobile / accessibility

Check acceptance criteria in PRD.md; confirm unresolved choices before treating these as final.

Fields: Review every form for Required/Optional labels before implementation.
Failure: Verify load, validation, save, delete, upload, analysis and feedback errors.
